The State Canals.

From time to time persistent efforts have been made by corporations and by individuals to secure possession of property belonging to the state canal system. In many cases encroachments ave long been made upon the public property until occupants feel that they have acquired rights that should prevail over the paramount right of the state. At the present time public at-tention is directed to Akron as the center of disturbance in this direction. center of disturbance in this direction. Two railways seek to appropriate certain parts of the canal for track purposes. In this they are opposed by friends of the canal and by citizens whose personal interests will be injured in case the railways succeed. The board of public works has been transformed to the seems and wined and direct ferred to the scene and wined and dined to their stomachs content. It is an old and very true saying that the surest way to reach a man's heart is through his stomach. That way seems to have been successful in this case as it is understood the board has conditionally agreed to grant the privilege of occu-pancy of the State's property by the alley railroad.

This method of securing favorable consideration of any doubtful plan is not new in this case; it has been tried with success in hundreds of cases in the past and will be again tried with sucss in the future. Notwithstanding this, any body of men possessing the power to act in a governmental capac-ity, has the surest element of weakness when it accepts of the so-called courtesy of a dinner and theatrical tickets from individuals or corporations directly in-terested in any decision it may make. Each member of the Board in question receives compensation from the State for the services he renders and when he eats, drinks and makes merry as a public official with persons who are interested in obtaining something of value without cost, he is abusing the trust placed in his hands by the suffrages of the people. A public officer cannot possess an unobscured vision after partaking of a wine supper provided with the particular purpose of influencing his judgment.

The questions of turning over to corporations or individuals any part of the canal system of the state for private or individual uses to the detriment of that important and expensive water way should not be left with the individual members of the board of public works. It should be their province to examine and report to the Legislature upon such applications as may be referred to them and there their authority in this re-gard should end. The granting of privieges should rest alone with the Legislature. Further, every squatter and intruder upon the property of the state without proper authority, should be ousted from his occupancy without ceremony. If a place of business beside the canal is of value to the occupant, the state is entitled to compensation

In these days of railroad and coal pools it is especially important that the water ways of the state be kept open and in repair. During a considerable part of the year they may prove a check upon railroad extortion in freight charges and so long as they remain under state contro! they should be properly maintained.—Plain Dealer.

A GREAT MISTAKE

has heretofore been made in the treatment of rheumatism, neuralgia, and nervous or sick headache. This is evidenced by the failure on the part of thousands of sufferers to find relief, even though' they have exhausted the skill of various physicians and tried numerous so-called remedies. To such Athlophoros is offered as a safe, sure, and quick cure. Its success has been phe-nomenal, and yet it is not surprising because it will do all that is claimed for it. The Athlophoros Co. will gladly refer any who desire to make an investigation to re liable parties who have been cured by it.

Geo. W. Hiff, 47 Ellen Street, Cincinnati, Ohio says: "The rheumatism rapidly spread through my whole system, until every muscle, joint and nerve was the source of agonizing pain. I was confined to my bed for four weeks, enduring almost a living death. I could not even bear the weight of a sheet over me. If anyone looked at me or came towards me I would scream out the very thought of being touched or moved would seem to cause more pain. I did not know what sleep was for three weeks, my people were treating and giving me every known remedy, the doctor did everything he could, but nothing did me any good Finally, one afternoon, my sister gave me a dose of Athlophorns and two more doses during the evening. That night, for the first in three weeks, I slept well. The next day the swelling began to go down, for i was inflammatory rheamatism, my legs and knees being swollen to nearly double the natural size. In a weeks time, with the aid of two canes, I went out for a walk. I continued the medicine using two bottles. is over a year since, haven't had the least symptom of a return of the disease and have not lost a day's work.

Every druggist should keep Athlophoros and Athlophoros Pills, but where they can-not be bought of the druggist the Athlo-phoros Co., 112 Wall St., New York, will

send either (carriage paid) on receipt of regular price, which is \$1.00 per bottle for Athlophoros and 50c. for Pills.

For liver and kidney diseases, dyspepsia, indigestion, weakness, nervous debility, diseases of women, constipation, headache, impure blood, &c., Athlophoros Pills are unequaled.

SOUTH DAKOTA,

Mr. Hill Determined to see His Bill Through Before Retiring-The People Satisfied.

WASHINGTON, Dec. 7.-The bill Hon. W. D. Hill relative to Dakota is a measure upon which the people of South Dakota are united. It proposes South Dakota a State. Mr. Hill made a good many speech s in that Territory this summer, and last summer, and

was well received. He says: "We will endeavor to get the Hill bill through the House as soon "We will endeavor to get as possible. It is understood that the South Dakota people intend to set their machinery in motion as soon as the Hill bill can be put through the House, without waiting for the action of the

TALK WITH THE SPEAKER. ST. PAUL, Dec. 7. T. V. Eddy, of

Watertown, says:
"Yes, I am speaker of the Legislature
of the State of South Dakota. The
second session of the Legislature will
convene at the capital at Huron, Dec. 15. Our constitutional convenitor has never adjourned sine die, and is to respond readily with students in formeet at Huron at the same time as the eign countries. Legislature. We don't know just what action we shall take when we meet, but we mean to do something that will but we mean to do something that will the kiss, but the older the cold the impress upon President Cleveland and the people of this country the fact that we are demanding certain things which

ought not longer to be withheld from us. Our chief desire is to be admitted to the Union of States, where we properly be-long, and for which we have every qualification. Our constitution now has a clause which practically forbids our State officers from setting the wheels of government in motion. The first subject to be considered by the Legislature will be whether or not it will be advisable to recommend the members of the constitutional convention to remove by amendment this clause, which alone blocks the wheels of an independent government. I can't say whether we will deem it advisable to so recommend or not. If we should, the President would have to resort to judicial or military interference and declare our State and government illegal. Of course we would make no armed resistance, but it would have the effect of making the issue of national import-ance. Our rights and wrongs would be discussed by every one, and it might hasten the day of our deliverance. Our Legislative body is composed of 99 members of the House and 33 members of the Senate. I think nearly every member will be in his seat when the Legislature convenes."

SCIENTIFIC MISCELLANY.

Among the Electricians.—Applications of electricity are daily becoming more varied. Among recent ones are telebarometers, telethermometers, telehydro-barometers, which respect-ively record, at distant points, air-pressure, heat, steam-presure, and water

A LENGTHENING LIST.-While the number of chemical elements had not reached seventy a decade ago, Prof. H. C. Bolton has prepared a list naming over forty elementary substances whose discovers has been announced since 1877. No less than nine of the sup-posed new elements have been detected this year by Crookes.

SCIENCE IN AUSTRALIA.—The colonies of Australia and the neighboring islands have some twenty scientific societies, with a membership of between 2,500 and 3,000. These organizations are to meet in 1888 for the purpose of forming an Australian Association for the Advance-ment of Science, similar to the important associations now existing in England, France and the United States.

THE CAMERA IN MEDICINE.—A new suggestion is that photography may become a useful agent in medical diagonal disclosing symptoms of disease. nosis, disclosing symptoms of disease before they are otherwise perceptible. In a recent negative of a child the face was shown as thickly covered with an eruption, no trace of which could be seen on the child itself until three days afterward, when its skin became covered with spots due to prickly heat. In another recorded case, invisible spots were brought out on a photograph taken a fortnight before an attack of small-pox.

THE STUFF OF DREAMS .- Most dream representations, according to the investigations of Wundt, eminate from actual, though weak, impressions on the nerves during sleep. Thus, an in-convenient position excites visions of aborious or painful experiences, difficult respiration produces the agony of nightmare, flying is suggested by the rhythmic movements of breathing, nudity by a fall of clothes from the bed, crawling things by skin irritations etc. The reproduction of past memories is associated with events which have left profound mental impression.

SPANISH GEOGRAPHY.—The field for geographical exploration is not exhusted even in Europe. Schrader states that in the north of Spain several ranges of mountains exist, some reaching height of 10,000 feet, which have no place on any geographical maps. In the Aran valley another discovery has recently been made. Triangulation showed a gap unfilled between two ranges of peaks which approached from different sides, had been supposed to form a single range; and further exploration proved that the gaps contained a large and hitherto unknown

SPEECH RECORDING.-A promising method of recording and reproducing speech is that of M. Leon Esquille, by a modification of the photophone. The speaking is done before a diaphragm having a highly polished surface from which a ray of light is reflected, and the record of this speech is obtained by simply photographing the ray of light upon a traveling band of sensitized pa-per. After having been developed, the articulation may be reproduced by proecting the image of the trace by means of a strong light upon a relenium re-reiver, the well known appartus for transforming light-impulses into sound-vibrations, and the speech is then neard through the telephone connected.

THE NERVES OF TASTE.—The discovery that heat influences one set of nerve-points in the skin while sensaions of cold are received by another set, has been followed by some interesting experiments, by two Italian physiologists, which indicate that the various tastes result from the exciting of quite distinct sets of nerve fibres in the tongue. The prolonged application of ice removed the sensibility for all tastes -sweet, sour, salt and bitter. Cocaine destroyed—temporarily, of course, sensibility for bitter only. Other substances, such as caffelne and morphia, reduced the power of discriminating between different degrees of bitter. lute sulphuric acid had a peculiar effect, causing distilled water and even quinine to taste sweet at the tips of tongue, although the bitter of the quinine was elsewhere tasted as usual.

VOLAPUK .- The plan for a "universal commercial language" originated about five years ago by Herr Schleyer, of Switzerland, seems to be meeting with greater favor than has been accorded other projects of the kind. It is re-ported that Volapuk is already spoken with facility by thousands of Europe-ans; huowledge of it is being disseminated by more than fifty societies scattered over England, Germany, Austira, Sweden, Holland, Asia Minor, and other countries. Volapuk grammars for the use of Hottentots and Chinese, besides all the European nations, are either in the market or in course of preparation; and two reviews, one entirey in Volapuk and the other with a translation on alternate pages, are regularly published. The special advantage of the new language is the ease with which it can be learned, eight lessons having enabled a Parisian class to cor-

The shorter the tunnel the sweeter

1887.

Harper's Young People. AN ILLUSTRATED WEEKLY.

Harper's Young People has been called "the model of what a periodical for young readers ought to be," and the justice of this commendation is amply sustained by the large circulation it has attained both at home and in Great Britain. This success has been reached by methods that must commend themselves to the judgment of parents, no less than to the tastes of children—namely, by an earnest and well sustained effort to provide the best and most attractive reading for young people at a low price. The illustrations are copious and of a conspicuously high standard of excellence.

An epitome of everything that is attractive and de drable in juvenile literature.—Boston Courier. A Weekly feast of good things to the boys and girls in every family which it visits.—Brooklyn Union. It is wonderful in its wealth of pictures, information, and interest.—Christian Advocate, N. Y.
